

Dryer Plant Project Tracker

Development Commit Schedule

COMMIT 1

Card & Data Cleanup

- Streamline card creation (Job #, Customer, Type, Status, Quoted Price, Notes)
- Job Number placeholder → TI-XXXX format
- Add Project Type field (Frac Sand, Soil Remediation, Aggregate, Parts, Other)
- Add Status field (Lead, Active, On Hold, Complete)
- Card color coding by Project Type
- Move Install Cost & Freight off creation screen → job dashboard
- Add Customer PO Number field
- Add Contact Log tab (calls, emails, meetings)

✓ COMPLETE

COMMIT 2

Schedule / Gantt View

- Per-job Gantt chart tab
- Milestone timeline with dependencies
- Lead time visualization per line item
- Critical path highlighting
- Job costing phases (Engineering, Procurement, Fabrication, Delivery, Install)

PROJECT
MANAGEMENT

COMMIT 3

Cross-Job Reporting Dashboard

- Global dashboard view above the board
- Total committed vs. actual spend across all jobs
- Jobs by stage & type breakdown
- Overdue deliveries alert list
- Forecast at completion per job
- Committed vs. actual cost layer

PROJECT
MANAGEMENT

COMMIT 4 Revision Log & Change Orders • Unified revision log per job (quotes, POs, drawings) • Change order tracking (scope, price delta, approval status) • Quoted Price locks on signed customer PO • Impact on margin tracked per change order	DOCUMENT CONTROL
COMMIT 5 Drawing Revision Control • Drawing register per job • Revision history per drawing • Link drawings to line items (ordered-off-rev tracking) • Drawing revisions feed into unified revision log	DOCUMENT CONTROL
COMMIT 6 RFI & Submittal Logs • RFI log per job (description, sent date, response date, status) • Submittal log (vendor submittals, approval status) • Open RFI count visible on card face	COMMUNICATION
COMMIT 7 Document Attachments • Attach files to jobs and line items • SharePoint / OneDrive integration via MS Graph API • Local file storage fallback	INFRASTRUCTURE
